

Bresco Broadband Open Internet Policy

Below are Bresco Broadband's Network Management Policy Disclosure Pursuant to the Federal Communications Commission's Open Internet Rules found in Part 8 of Title 47 of the Code of Federal Regulations. #NetNeutrality

Bresco Broadband policies regarding network management practices, performance characteristics are provided so that Bresco Broadband's current customers, prospective customers, third-party content providers and other interested parties can make informed choices regarding the broadband Internet services offered by Bresco Broadband and the extent to which network management practices may affect those services.

Bresco Broadband has always supported a free and open Internet and will continue to do so in the future. Bresco Broadband has no plans to limit its customer's ability to access any content made available on the Internet.

Network Management Practices

Bresco Broadband utilizes reasonable industry standard network monitoring and management practices to achieve the best throughput and network performance for its customers. By engaging in reasonable and responsible network management, Bresco Broadband prevents its customers from being subjected to the negative effects of DDOS, spam, viruses, security attacks and other risks that threaten to degrade service. The network management practices employed by Bresco are consistent with industry standards and those of most other Internet carriers. We reserve the right to temporarily remove a customer who may negatively impact the Bresco broadband network or other customers, content providers use of the Internet.

Congestion Management

Bresco broadband does not employ any network congestion management, also known as traffic shaping tools and/or software on its network traffic. Bresco Broadband maintains sufficient bandwidth and upstream peering connections to service its customers. Internet traffic is passed directly through to/from Bresco Broadband's upstream connections and peers to/from its customers.

Bresco Broadband employs a standard best effort Internet delivery policy to ensure that any customer or entity connected, directly or indirectly, to the Bresco Broadband network backbone may exercise a choice in lawful Internet content, web-based application and use of Bresco Broadband or a competitor's service, including any device which will not harmful to the network.

Network Openness and Fair Use

Bresco Broadband actively participates in and encourages open settlement-free peering with upstream providers and Internet network operators. Bresco Broadband's network management policies prohibit the discrimination of legitimate or legal use of network capacity bandwidth by application, source or use of the network. The Bresco Broadband Network does not limit or impose any limitations on users to lawfully possess, use, receive or distribute Internet content. Bresco Broadband does not favor any Internet applications or content over others, and is committed to enabling competition among network providers, application and service providers, and content providers.
