

Megaport was founded in 2013 with the aim of becoming a global leader in the fast growing elastic interconnection services market. Using Software Defined Networking the Company has developed a platform that provides customers with the ability to provision interconnection services between their network and other networks and cloud providers already connected to the Megaport Fabric.

Megaport operates globally with over 600 active customers and secured partnerships with some of the worlds major cloud service providers, network operators, and content providers. Megaport is an Amazon AWS Technology Partner, Microsoft Azure ExpressRoute Partner and a Google Cloud Interconnection partner.

### At Megaport we have created a better way for networks and cloud to interconnect, here's how:

#### Multi-cloud ecosystem

Secure connections to multiple cloud providers over the one ubiquitous fabric.

#### Scale bandwidth instantly

Service provisioning in seconds, not weeks.

#### API integration

100% API driven, so our powerful tools are your powerful tools

#### Flexible terms

Customers can provision an elastic interconnect between other participants for as short as a day or for as long as a year, for as small as 1 Mbps to as much as 100 Gbps.

### Elastic Interconnection

**Elastic connectivity is a term used to define a connection which provides customers with the flexibility to vary their connectivity service requirements based upon their actual demand.**

Megaport supplies elastic connectivity for Internet Peering and virtual connections to users and services. These can be controlled via an API stack, mobile app, or web portal ([megaport.al](http://megaport.al)) to enable automation and service flexibility.

- ✓ Instant access to cloud, carrier, and content services from any Megaport connected data center
- ✓ Enabling enterprises to connect multiple data centers and markets
- ✓ Plan, manage, and deploy in real time through a fully automated software platform

## Products

Megaport provides users with flexible contract terms offering daily, monthly or yearly options compared to the multi-year contracts typical of the old interconnection platforms. Megaport's customer proposition is a quicker, cost-effective, and more user-friendly product, all accessible via an award-winning web-based portal - [megaport.al](http://megaport.al)

#### What is a Megaport?

A Megaport is the high speed Ethernet interface that connects to the Megaport™ fabric. Bandwidth options between Megaports range from 1 Mbps to 10 Gbps.

#### VXC (Virtual Cross Connect)

A direct Ethernet connection between two Megaports allowing high speed, private connectivity. VXC's are provisioned within minutes allowing rapid deployment and instant time to revenue.

#### MegaIX

Megaport owns and operates a 100% neutral Internet Exchange and provides connectivity to content networks and services across multiple geographies.
